

Parata ULT™

UNIVERSAL LIGHTED TRAY

TRAY YOUR NON-CANISTERED MEDS FASTER

- Streamlines productivity by utilizing LED lights to direct filling locations
- Each cell holds multiple medications for one pouch, resulting in reduction of trays per batch
- Pre-stage multiple trays in advance to maintain an even and consistent workflow between filling and checking
- Color-coded LED lights ensure accurate filling and patient safety
- Add on as many docking stations per ATP® as required for your business
- Paperless system lessens chance of errors through the fill process

INNOVATIVE SOFTWARE

- Color indicators on the screen for visual recognition of ¼ tab, ½ tab, and whole pills
- Database from the ATP drives the image database for the ULT, so as you update images, changes are reflected across both devices
- Interface makes generic swaps effortless
- Lighted Tray Receipt Report includes:
 - User Tracking
 - Control checks and reports

Parata ULT™

UNIVERSAL LIGHTED TRAY
