

Streamline Pharmacy Fulfillment Operations with Parata Stratus™

Integrated cloud-based analytics, scalable across various pharmacy models, designed to support fulfillment productivity and operational efficiency.

Oversee Pharmacy Automation Effectiveness

Monitor and take action on system health, production rates, refill activity and inventory management using reporting insights from consolidated dashboards able to integrate with BI tools.

Efficiency in Data Management

Whether you're overseeing a single device or your entire pharmacy network, leverage a wide range of reports and data-driven analytics to quickly identify and act on areas for improvement - enabled by secure, cloud-based access anytime, anywhere.

Rely on Dedicated Expertise

Leverage efficient implementation, ongoing IT support, and reliable security standards delivered by an industry expert.

Single user interface: Access actionable insights through consolidated, comprehensive reporting in addition to near real-time analytics and inventory.

Centralized dashboards: Gain multi-site, multi-system visibility into critical operational metrics without the need for manual aggregation or data entry.

Enterprise reporting: Enable reporting at scale across all your sites and systems and integrate near real-time data from Parata automation into your business intelligence system.
