Elevate pharmacy
productivity.
Safeguard patients.

BD Parata InspectRx™2 is your precise,
high-speed inspection solution.

BD Parata InspectRx™2

The need for efficient automated inspection

Meeting stringent regulatory standards for packaging integrity and safety requires robust and streamlined inspection processes.

Manual visual inspections can be slow, labor-intensive and inefficient.

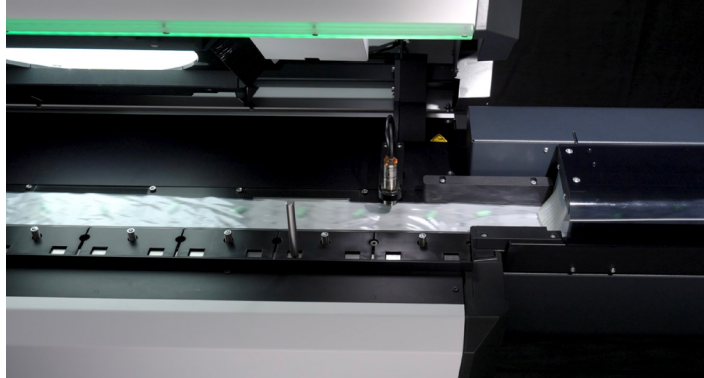

Requiring a high level of training and prone to human error, manual vision inspection can lead to variability in inspection quality and missed defects, such as tears, punctures or improper seals.

Significant labor shortages worldwide and rising costs are increasing demands.

The rapidly growing medication adherence market is driven by an aging population and number of people living with chronic illness who seek an easier way to manage medications.

Stay ahead of rising prescription volumes

BD Parata InspectRx™ 2 is a high-speed automated pouch inspection solution helping improve efficiency and consistency.

Detect defects and errors, both visible and hidden to the human eye

Support patient safety, compliance and long-term cost savings

Count on expert assistance from implementation to ongoing maintenance

Optimize and grow your pharmacy with an industry leader that can deliver flexible automated solutions and support your evolving needs now and in the future.

Precision for every pouch. Performance that keeps pace.

Meet pharmacy demands while reducing the risk of human error with automation that detects incorrect, broken, or overlapping pills and consistently cuts on the cross-seal.

Increased transport speed

Fastest on the market, with speeds up to 12K

Reduced false alarms

Shaker spreads the pills in the pouch without damaging them

Optimal roll quality

Winder designed with drop sensors and an enhanced pin-and-bridge system
