

Certainty at the heart of your operations

Achieve connected, cost-effective pharmacy operations with the BD Parata™ Central Fill Solution.

Modernized prescription filling empowers high-quality patient care

Transitioning to centralized pharmacy fulfillment represents a major investment. The gains in patient care, cost per fill and inventory management are simply too large to ignore. For health systems willing to invest, the returns go beyond just cost savings.

BD is here to help. When execution, timing and long-term confidence are critical, BD is a reliable partner you can trust. Let's build the future of your pharmacy system together.

”

You don't want to build a central fill facility just to automate. You want to build it because you want to own the entire prescription journey for the patients in your health system.¹

Joshua Weber, PharmD

Senior Director of Ambulatory, Retail and Specialty Pharmacy Services at St. Luke's Health System

Choose a Central Fill solution built by a **global leader** in pharmacy operations.

BD partners with you to strategically implement a Central Fill solution designed for proven performance—balancing scale, flexibility and execution certainty across the full system.

With BD, some customers achieved **ROI as early as one year.**^{*2}

Turn investment into value

Backed by 130 years of innovation, BD delivers tailored solutions that help you unlock new revenue opportunities, optimize inventory management, and maximize ROI through high-quality automation, software, and expert service.²

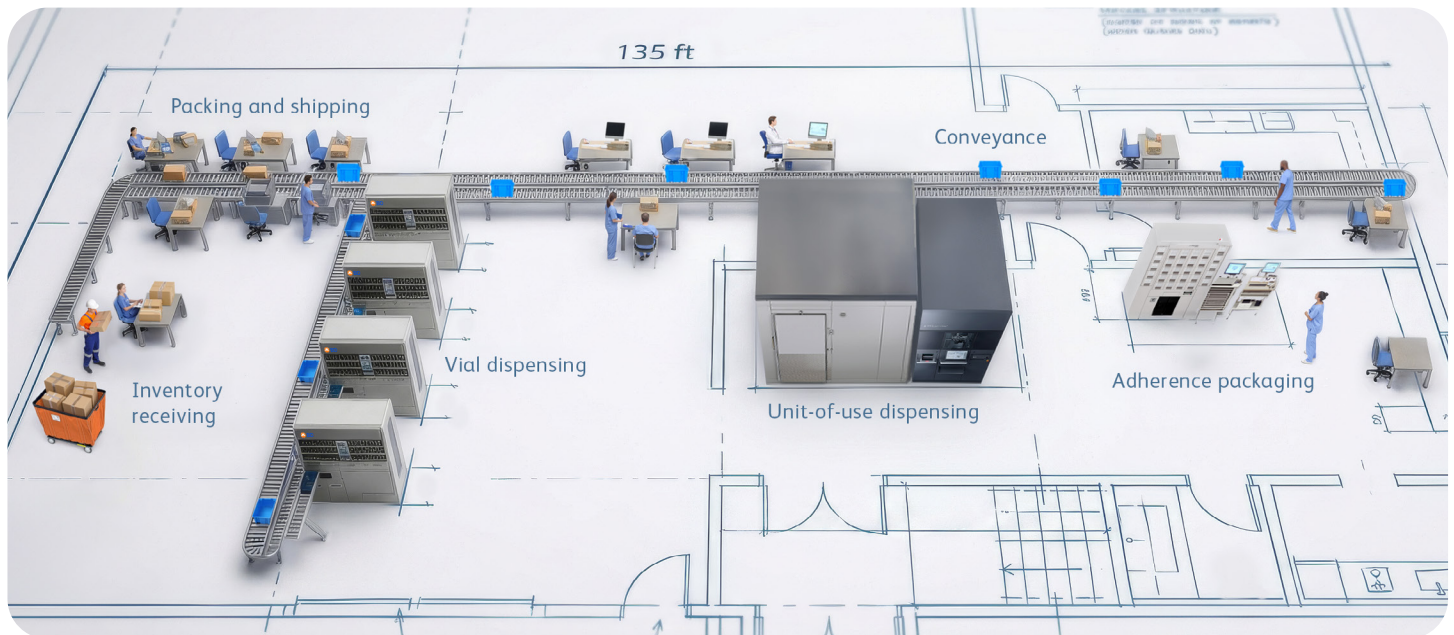

Proven approach to centralized fulfillment

We don't upsell you on an optimistic vision that takes years to achieve. Or, burden you with solutions built on ideal-state models or single-step optimization. Instead, BD prioritizes full-system performance, operational continuity and long-term scalability as you increase prescription capture.

Building the future, together

Designed for real-world variability, from peak volume surges to exception handling, ensuring consistent performance across the entire workflow.

Design

Implementation

Consulting

Ongoing service
& support

Purpose-built solution that delivers efficiency and scalability

Strategic decision-making

Using system assessments, feasibility studies, ROI modeling and proforma development.

Experienced support

Experts with deep knowledge of Central Fill operations, workflow design, and pharmacy automation.

Aligned to your goals

Using your formulary to build around your health system's unique needs.

The BD Difference

Oversee the entire medication journey

Our Connected Care vision is to activate medication and monitoring data to enable enterprise-wide decisions through a connected ecosystem of devices, automation and systems from pharmacy to bedside and beyond with AI-powered BD Incada™.

Secure, scalable cloud

High-fidelity data

AI-driven insights

Smart fulfillment through integrated software

Count on high-performance robotics and continuous investment into new software innovations to help achieve your pharmacy's goals, even as they evolve.

End-to-end software

Access real-time data insights into inventory management, order processing, staff productivity, shipping logistics and final delivery—all on a unified dashboard.

EHR integration

Integrates with most electronic health records (EHR) and pharmacy management systems (PMS) to unify workflows and enable integrated pharmacy operations.

Experienced partnership that empowers long-term success

From design through optimization, BD supports the full lifecycle of your Central Fill investment. Our dedicated in-house specialized maintenance and engineering experts deliver responsive, reliable service and maintenance.

Unlock performance with a trusted, innovation-driven leader

Combine a high-quality solution and ongoing innovation for your health system.

Proven at scale

BD has deployed across multiple Central Fill sites.

Designed for real-world performance

We optimize your system, not sell an idealized model.

End-to-end lifecycle partner

From design, to implementation to optimization.
