

# Parata™ Assist

## **Blister Production Guidance System**

The efficiency of your blister packaging program is critical to the improvement of the health and safety of your patients and the growth of your business.

**Parata**

# Minimize Human Error

Parata™ Assist™ bridges the gap between completely manual blister packaging and full-on automation. It allows for a semi-automated filling process, which can lead to more accurate and efficient production of single- and multi-dose blister cards.

## Highlighted Features:

- Barcode and biometric scanning ensure secure production and track responsibility.
- Touch screen computer offers on-screen guidance for accurate medication placement.
- Advanced software allows for customized labels.
- Production tray fills 8-10 cards at a time.
- More secure placement of exception meds like half tablets when using Parata™ automation.
