

Parata™ XF

We know how tedious manual blister packaging filling can be. It can take valuable time that your staff could be focused on other, more beneficial, activities. Diversifying adherence or med pass programs with blister packaging **can extend your pharmacy's reach** and helps you to adapt to different patient groups and facilities.

Parata

Designed to maximize your efficiency

Parata™ XF is an automated dispensing system for solid oral medications in both single-dose and multi-dose blister packs.

Highlighted Features:

- Highly accurate pick and place technology
- Production rates of up to 45 multi-dose cards per hour and up to 85 single-dose cards per hour
- Barcode and biometric scanning ensure accuracy and track responsibility.
- Compatible with a wide variety of blister packs
- Generates color-coded labels with customizable printing options.
- 400 calibrated medication containers, easily calibrated on-site, at no cost, and with no time wasted
- Reduces production time by up to 80% with a single operator

Parameters	Specifications
