

# SynMed®

## AN AUTOMATED ADHERENCE SOLUTION FOR YOUR PHARMACY

- ✓ SynMed® is an automated dispensing system for solid oral medications in blister packs

- ✓ SynMed® is a way to reduce costs, achieve high levels of dispensing accuracy, and a safe way to grow your business

## Speed / Efficiency

SYNMED® WILL PICK AND DISPENSE 55 DOSES PER MINUTE

### SynMed® reduces production time by up to 80% compared to manual preparation

In practice, one technician has been shown to produce:

- > Up to 110 single dose blister packs per hour
- > Up to 45 multi-dose blister packs per hour
- > 300+ multi-dose blister packs in an 8-hour shift
- > 1,000+ multi-dose blister packs over their regular weekly schedule
- > Pharmacist verification time will be reduced by at least 50%, due to the system accuracy and proprietary verification markers on the label

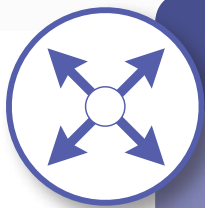

## Accuracy

BARCODE AND BIOMETRIC SCANNING ENSURES SECURE PRODUCTION AND TRACKS RESPONSIBILITY

- > The system accuracy is 99.9%, as compared to manual production where one can expect a 5 - 10% error rate
- > The label identifies the quantity of medications expected in each blister
- > Unlike pouch technology, any error is identified by the operator before the card is sealed; this avoids any modification to the packaging and substantially diminishes the intervention time

## Versatility & Flexibility

SYNMED® CONTAINS 400+ MEDICATION CONTAINERS;  
THIS WILL COVER 98% OF ALL MEDICATION REQUIRED

### SynMed® can adapt and interchange between both single and multi-dose blister packs

- > SynMed® is compatible with 35 (and growing) blister packs
- > SynMed® will interface with your existing pharmacy management system; no double data entry
- > SynMed® will interface with your system for eMAR

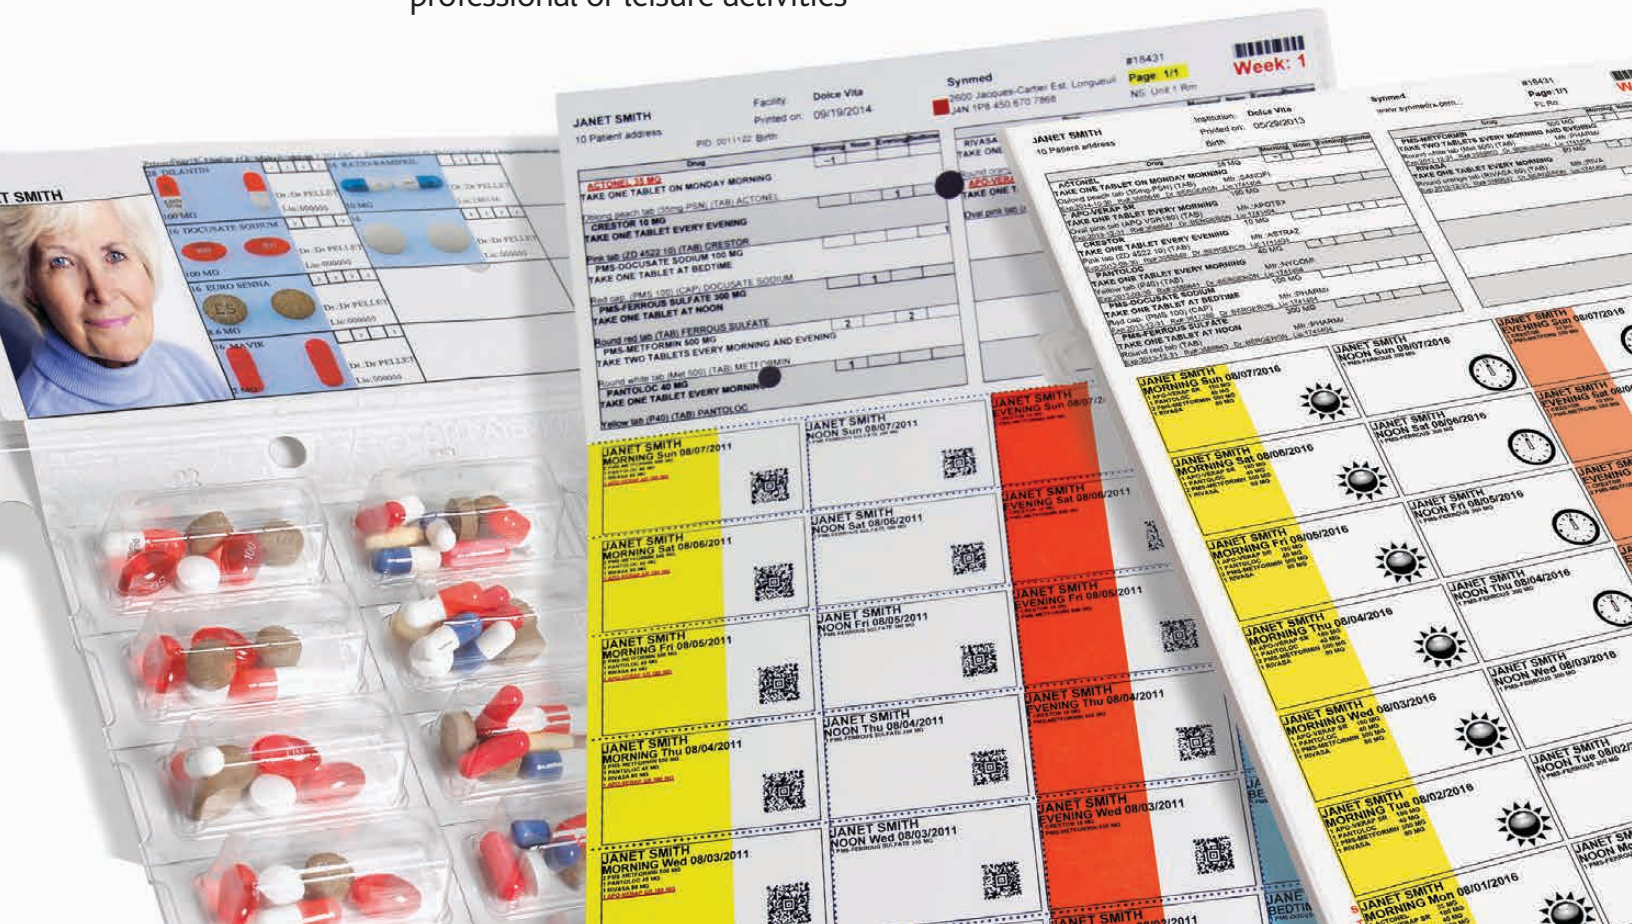

# Unique Adherence Label generated by SynMed®

## Key Features:

- > Color coded for time of administration
- > Customized printing options:
  - Pictogram for time of administration
  - 2D barcode for use with eMAR
  - Patient picture
  - Pharmacy logo
- > Medication images – provide accuracy assurance, and facilitate change management
- > Bold, large font print – much easier to read than strip pouch packaging
- > Detachable blisters, for use by nursing personnel in long term care establishments, or by autonomous individuals who wish to carry only the needed medication during professional or leisure activities

# A SUMMARY OF HOW SYNMED® BENEFITS YOUR PHARMACY

- > The ability to offer a unique adherence label and convenient blister pack will enhance customer loyalty and retention
- > Putting a **Medication Synchronization & Medication Adherence** Strategy in place is good for patients and good for business
  - The average patient fills 7.4 out of 12 refills on each maintenance Rx
  - With meds in sync they fill an average of **11 out of 12 refills**
  - For every 100 patients in sync = **\$90,000 in annual revenue** from the same patient base
- > Pharmacy is shifting from “Pay for Service” to “**Pay for (Patient) Outcomes**”
  - Drive CMS star ratings
  - Improve reimbursements
  - Ensure network status
- > SynMed® is a safe and accurate way to scale blister card production; once automated with SynMed®, customers universally report instant savings and efficiencies, and a substantial increase in their blister card production

## WHO IS SYNERGY MEDICAL?

For almost 10 years, we have been providing proven and reliable technology for blister card automation, now used daily for 145,000 lives. We are dedicated to the design, manufacture, service, sale and support of the SynMed® System.

Since our first installation in January 2008, there have been hundreds of SynMed® installations in retail drugstores, long-term care institutions, and in pharmacy chains that have centralized their blister card production service (Central Fill operations).

Our clients are found throughout Canada, the United States and in Europe.

Synergy Medical software engineers are continuously working to upgrade our technology, and our team is specialized in pharmacy automation, ensuring a customized turnkey solution for you.

We work closely with each pharmacy to enable a seamless implementation.
